

HAROPA PORT in a time of innovation

Development of research is certainly a core focus for the national port strategy adopted in 2021. But HAROPA PORT has not been slow in recent years to make its mark as drivers of innovation.

Published on 6/09/2023

Ranging from risk management to energy and the environnement, and including logistics, **the first french port has made innovation a pillar of its growth model**, particularly by taking advantage of the potential offered by the new digital technologies.

Its role in pioneering initiatives varies: it may be a direct actor, a partner, an assembler or a facilitator, among other roles...
