CALL FOR EXPRESSIONS OF INTEREST GRAND-COURONNE AND MOULINEAUX INDUSTRIAL PLATFORM

HAROPA - Port de Rouen industrial platform is one of 5 Normands « Key in hand » sites selected by the French government as part of the « Stimulus Plan »

Land with a total area of more than 50 hectares located along the Seine, including a former site of the RENAULT group located in the towns of Grand-Couronne and Moulineaux, expanded in connection with other available land. These lands are located to the west of an international distribution platform of nearly 200 hectares, "Rouen Vallée de Seine Logistique" (RVSL), which concentrates high value-added cargo consolidation activities adjacent to the Container and Miscellaneous Goods Terminal (TCMD).

Downstream of this area of more than 50 hectares, there are lands open to urbanisation also intended to accommodate industrial-dominated economic development projects with an area of 17 ha that can be extended in the medium or long term, under conditions to be defined, to 24.5 ha.

Your project may cover all or part of the site.
