

KPI's / performance Discover the new edition of our annual performance indicators (2021)

Since 2014, HAROPA PORT and actors of the port communities of the Seine axis have published an annual edition of performance indicators, resulting from the collaborative work of all the actors working to facilitate the transit of goods. Published on 30/03/2022 - Updated 21/08/2023

These indicators, enriched as the editions progress, include sea and land performance, the transit of goods (road, rail, river mode) for containers, ro-ro and solid bulk (cereals focus) as well as performance customs and sanitary.

Find this annual edition in dynamic mode in the [My KPIs web module](#) for monthly monitoring of containerized flows through Le Havre's HAROPA PORT terminals and a management of your performance.
