

innovation DrakHAR : the Rouen's new Port Community System

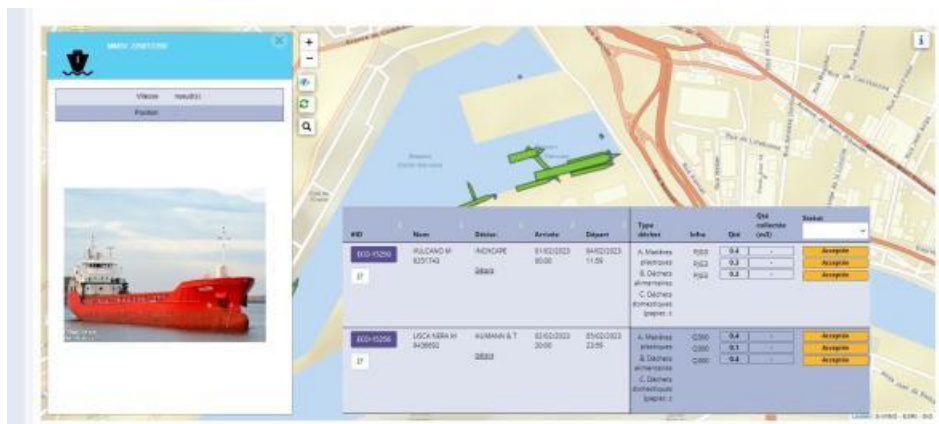

To facilitate interconnectivity between ports, HAROPA PORT is deploying a new Port Community System (PCS) in Rouen. Called DrakHAR, this solution will increase interoperability with Le Havre and the players in the two port areas. Published on 2/04/2023 - Updated 19/10/2023

HAROPA PORT continues to innovate by developing a **new Port Community System (PCS)**. The first stage of the project began on February 1st, 2023 with the launch of the **ECOPORT module dedicated to the collection and management of ship waste**. It allow a common IT solution on the Seine axis.

In a few weeks' time, **port dues** will also be connected; the **management of stopovers** will be harmonized next November.

Thanks to this solution, HAROPA PORT is anticipating the EU directive n°2019/1239. From January 1st, 2024, worldwide's ports will have to operate a maritime single windows.

Developed in-house, the maritime and port Single Window is taking place within HAROPA PORT.
