

innovation Easyport, to simplify and fluidify the passage of goods through the port

HAROPA PORT and SOGET are joining forces and pooling their skills by creating the Easyport economic interest grouping. Objective: to produce high-performance digital solutions to facilitate the passage of goods for the port, maritime and logistics communities.

4 main objectives

In order to offer to the supply chain actors the best experience in terms of facilitation of goods, Easyport is structured around four priority objectives

- > anticipate and respond to regulatory and industrial developments;
- > be the pilot of the digital transition of the Seine axis and in France;
- > develop and deploy an innovation strategy to simplify and facilitate the passage of goods through the port;
- > build a development strategy for our port facilities in France and internationally.

Solutions for performance

HAROPA PORT and SOGET have been working together for many years. The combination of S-WiNG, the port information system developed by HAROPA PORT, and S)ONE, a port community system developed by SOGET, already offers a one-stop port environment for a fluid and cyber-secure movement of ships and goods on the Seine axis.

With Easyport, other solutions are being developed, including:

My T&T : this new tracing solution allows, from a simple container number and without the need for authentication, to follow the goods in transit, from their arrival at the port until their departure.

It allow to optimize transport and logistics operations, reduce costs and avoid delays or handling errors.

The application, which is free to use, can be accessed from a PC, tablet or smartphone.

The visibility of your goods within easy reach, a French exclusivity
