

France Terminal

- Territorial Department of Le Havre -
Published on 21 February 2022

The Terminal de France (TDF) is ideally situated outside the locks to facilitate access to the largest vessels. We are therefore in a position to deal with the productivity constraints of shipping companies. TDF also offers exceptional infrastructure, large storage areas and efficient loading and offloading times due to its equipment and the intermodal dynamic connectivity enjoyed by Le Havre.

MIN. WATER DEPTH:

Quai du Havre

Deep sea vessels : 1200 m at 15.30m lowest spring tides
Sea and River barges : partial dredging on 200m
