

sectors, traffics Le Havre in the WWA South African service

To cover the citrus season, Hapag-Lloyd enhances its operations in the African continent by updating its West-Europe-West-Africa (WWA) service and provides a direct service from Durban and Coega to North Europe via Le Havre.

In addition to the West African ports (Congo, Gabon, Angola and Cameroon), the **WWA service has been extended** to two South African ports (Durban and Coega), **making Le Havre the 2nd import port.**

The Dachan Bay Express, the first ship in this rotation, **made its first call at Le Havre** on April 26, at the **Atlantic terminal operated by CNMP.**

With **competitive import transit times** - Coega > Le Havre: 25 days; Durban > Le Havre: 29 days - this direct link **consolidates HAROPA PORT's position in the African market**

The port already has almost 540 commercial offers (200 in Rouen) and reaches 80 ports. In 2023, more than 250,000 TEU were handled.
