The Seafrigo group, historic partner of HAROPA PORT, continues on the port area of Le Havre.

The project includes the **construction of an 13,000 sqm temperature controlled logistics platform** dedicated to frozen flows from large retailers and food-processing industry. It will be able to accommodate 35,000 pallets and will be equipped with narrow aisle trucks to optimize productivity.

The construction will begin before the end of **Q2 2023** and the launching is expected to take place in the end of 2024.

This signature reinforces HAROPA PORT's position as a major player in logistics real estate on the Seine axis.
