Digital technology serving port efficiency

Jérôme Besancenot, Digital Transition Project Manager, will take part in the panel discussion *"Promoting the sustainability of port operations through digital tools and technologies"* on **12 November at 4:30 p.m.**

He will use this opportunity to present the **projects led by HAROPA PORT aimed at facilitating and streamlining cargo flows through technological innovation**. Among them is the **MyETA** application, developed by **Easypart**, which provides the estimated time of arrival of ships.

A global event for smart ports

Organized by **Port Technology International**, the conference brings together global experts to explore emerging technologies such as **artificial intelligence, digital twins, 5G connectivity, drones, and port automation**.
