Strategic location

URL of the page: <https://www.haropaport.com/en/temperature-controlled-goods>

- The gateway to the Paris region, the biggest consumer market in France and the second biggest in Europe.
- The logical port for the Rungis national wholesale fresh produce market (Paris).
- Connected to two international airports Orly and Roissy-Charles de Gaulle, Europe's leading airport for freight.

Dynamic traffic

- Reefer traffic has seen +35 % growth in the last 10 years,
- It is finely balanced between positive and negative refrigeration.

Why choose HAROPA PORT?

A first-rank offering of maritime containerised goods services

- **An exceptional geographic location:** the first port reached for imports and the last for exports in the Northern Range.
- **A deep-water port:** access around the clock for the world's biggest container ships fully loaded, with no tide constraints.
- **A comprehensive maritime offering** and the presence of all shipping alliances at the port.

A port community specialising in reefer traffic

- **50 specialist freight forwarders,**
- **Qualified service providers** for services to refrigerated containers (repair and maintenance),
- **Installed reefer refrigeration facilities** plus the biggest logistics firms:
 - 1.1m cu. m. storage capacity,
 - Value-added services.

Dedicated equipment covered by a specialised reefer protocol

- **3,100 reefer plugs** at the Seine axis terminals,
- **Remote monitoring around the clock** of containers fitted with modems at the Le Havre terminals (temperature and humidity read-out).
- **An attractive temperature-controlled road haulage offering:** 100 road transport firms for containers and conventional loads, full and consolidated.

Did you know? Unique in France: a one-stop-shop for all your BIP, CEP, DEP and Customs checks and inspections!

- **a single control centre** for BIP (Border Inspection Post), CEP (Community Entry Point), DEP (Designated Entry Point) and Customs,
- **simplified customs procedures** based on the France Sésame digital platform: facilitation of follow-up and management of formalities and administrative checks linked to cross-border movements of sanitary and phytosanitary goods.
