

## HAROPA PORT, turnkey solutions for in-city river logistics for your exceptional packages

**A spectacular delivery by river right into the heart of Paris**

for two domes each weighing 6 tonnes and over 6 meters in diameter carried from Charenton port to Montebello port at the foot of Notre Dame.

► This challenging logistics operation was one more demonstration of **the advantages of river transport for final-kilometer logistics** and the relevance of HAROPA PORT's port complex, which makes possible – thanks to its 70 ports across the Greater Paris area – the delivery of outsize packages right into the heart of the city.

►► A look back on this exceptional delivery in this video!

►► The Seine offers a sustainable transport mode to suit packages of exceptional size and weight in an urban context.

**Transportation of large volumes**

► No size or weight issues

**Limited carbon footprint**

► Approximately three times less CO2 per tonne carried compared with road transport

**Less inconvenience for local residents**

► No traffic disruption  
 ► No noise, no visual pollution
