

## CLASQUIN launches a new freight consolidation service to Africa, departing Rouen

Using its new logistics platform in Rouen, Clasquin is offering its customers reliable, competitive solutions for exports to Africa's main destinations.

### A bonded, secure platform strategically located in Rouen

- Bonded warehouse ideally located near the [TCMD](#) container terminal
- A dedicated team with extensive knowledge of maritime exports to Africa (compliance, documentation, stuffing, bracing, and more)
- To date, regular departures to 11 destinations in Africa
- Advanced on-site security, 24/7/365
- Valued-added services: repackaging, labelling, inspections,...
- TAPA Compliant, ISO 9001, OEA

### Rouen, a strategic rear base for a decarbonized logistics corridor

This new service gives CLASQUIN's customers the benefit of a decarbonized logistics system that goes via the HAROPA PORT corridor, combining river-based goods transport from Rouen to Le Havre, where they can be sent on by sea to the African continent. Le Havre and Rouen are connected by 7 river services every week.

### This new service reflects Rouen's long-standing freight consolidation expertise

This additional LCL service to Africa comes as confirmation of the expertise of Rouen's logisticians for freight consolidation on North-South trade routes, historically a long-standing activity for the port of Rouen.

HAROPA PORT thus reaffirms its position as France's leading port for maritime export freight consolidation.
