

A virtuous social and environmental alliance Envie - Derichebourg on the port of Gennevilliers

► March 2021

Circular solidarity economy

The Envie Federation and the Derichebourg Group work together in support of the environment and social inclusion with the help of HAROPA.

Envie 2E Ile de France is part of the dynamics of the Social Economy - helping people in situation of social and professional insecurity to bounce back towards sustainable - and circular - employment through its activity of recycling Waste Electrical and Electronic Equipment.

Derichebourg Environnement, located on the Gennevilliers site, offers a comprehensive, integrated range of services covering the collection, management, recycling and recovery of end-of-life capital and consumer goods, recovery materials and industrial waste.

A virtuous, solidarity alliance between the two partners on **the port of Gennevilliers**:

ENVIE 2E site
Waste recovery
Sorting
