

## 4 new XXL gantry cranes at the port of Le Havre: GMP - PortSynergy is investing in Le Havre for the future

► September 2020

### Spectacular delivery in Le Havre

4 latest generation gantry cranes reached on August 13<sup>th</sup> their home port, the Terminal de France at Port 2000 in Le Havre.

Larger and more efficient, they complement the 10 gantries already in service at the Terminal de France, operated by GMP - PortSynergy. They will be operational in October.

### Some of the largest gantry cranes in the world

- 54 meters high under spreader
- Capacity of 26 containers in width
- Lifting capacity of 80 tonnes

### A major investment in the port of Le Havre

Improved port tooling performance of Le Havre handling operators

Excellent nautical conditions  
Deep-water port accessible without tidal constraint

- A combination that allows HAROPA - Port of Le Havre to welcome the largest containerships in the world and to come and to reduce the call times.
