

HAROPA welcomed the shipping company **SEVENSTAR EMT** for an exceptional load operation

► December 2020

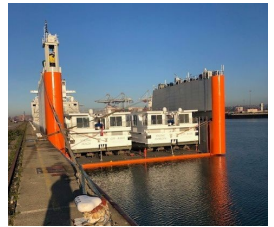

Exceptional cargo in Le Havre

The shipping company **Sevenstar Exceptional Marine Transport**, a member of the Spliethoff Group, has successfully completed in early November the relocation of 2 river cruisers from Rotterdam.

►► This operation, organized by the shipping agent **Humann & Taconet**, was completed within a **48-hour time frame** - including loading, transport and discharge - at the Asia-Osaka terminal in Port 2000.

A journey realized by the semi-submersible vessel 'Yacht Express' whose characteristics are impressive:

- 209 meters long and a beam of 32.2 meters;
- Unique 'Float-on / Float-off' loading method that allows discharge without crane.

'HAROPA wants to highlight the expertise of the port's specialists in exceptional packages. This new operation accomplished with Sevenstar - one of the world leaders in Yacht transport - is a mark of confidence in our ports.'

Laurent Foloppe
Commercial and Marketing Director HAROPA

'We are proud to have performed this transport and to have delivered the River Cruise Vessels to our client in perfect condition. This with the excellent cooperation of the Port of Le Havre and our agent Humann & Taconet.'
